

A dramatic landscape photograph featuring a large, bright lightning bolt striking the ground over a body of water. The sky is dark and stormy, with several other smaller lightning bolts visible in the background. The water in the foreground is dark, and the overall scene is atmospheric and intense.

System Operations Training

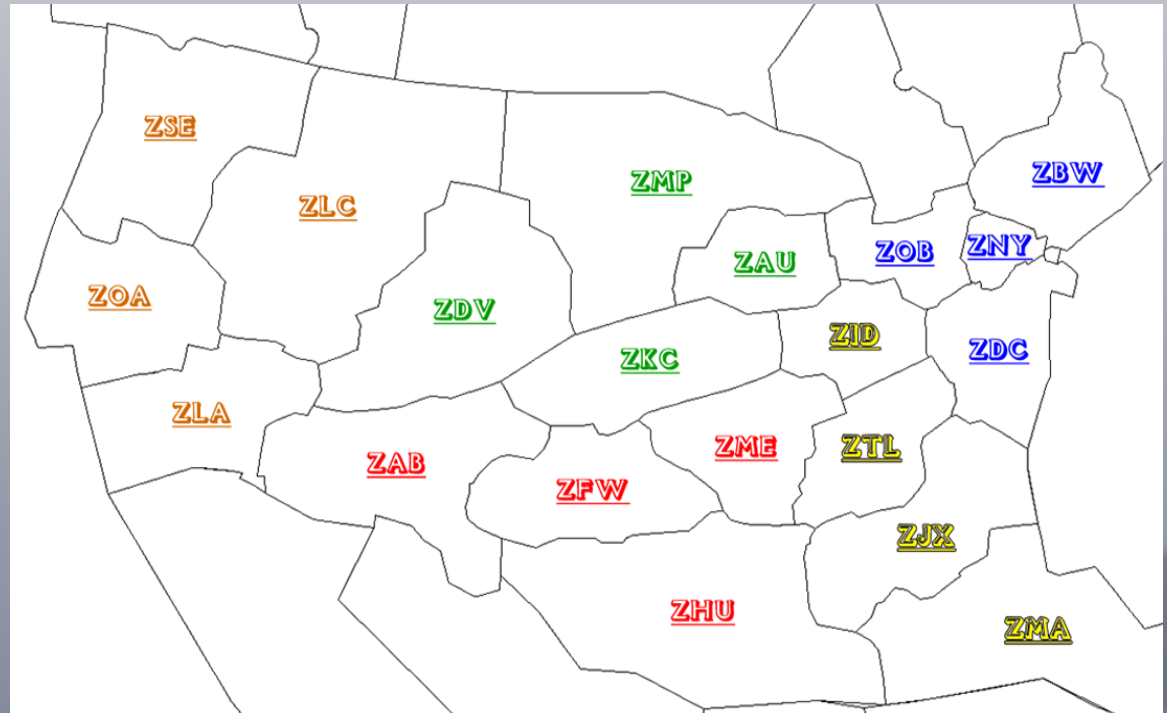

Face to face training is best but not always possible when training an operational group like controllers. Shift work and rotating days off make it hard to train large groups.

System Operations uses e-LMS to supplement It's classroom training. Putting the training on e-LMS and assigning it to personnel that can not attend the more formal classroom ensures they will get it before the new equipment or procedures go into effect.

On-Line Electronic Training also allows us to provide training to Traffic Management Units located in field facilities throughout the country.

Looking forward to integration of weather into DSTs

Why: Reduced interpretation of weather information and guidance

Need more insight on “philosophy” of the tool vice knobology

Why: Improved TMI decisions
