

Weather Means **Business**TM

Matt Taylor
Director, Aviation Business Development

We Are The Weather Company

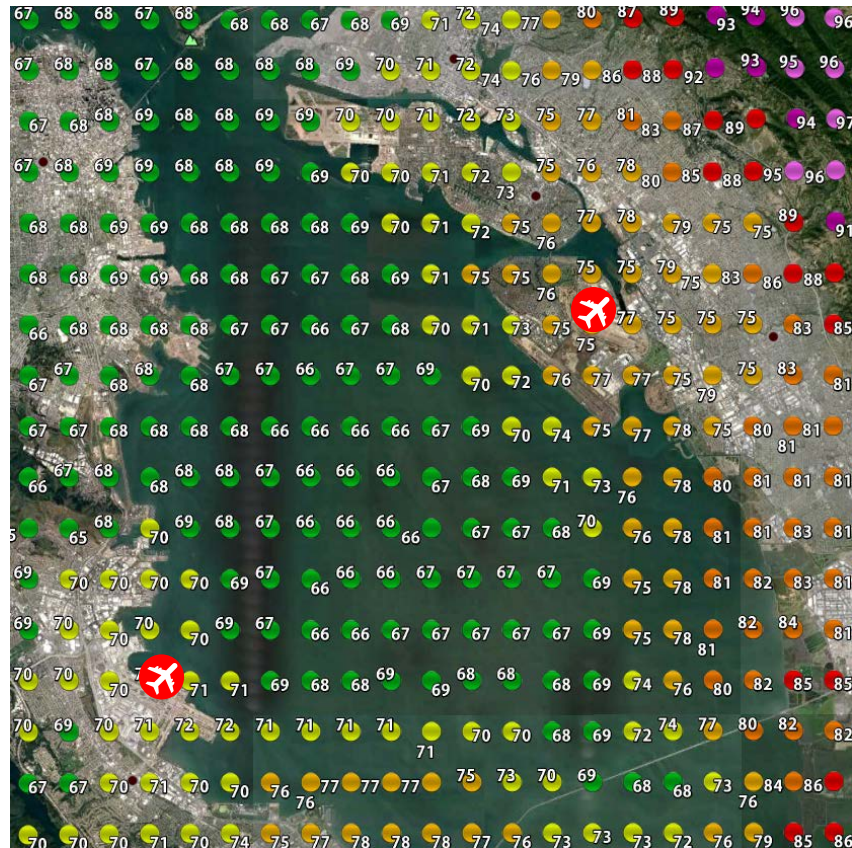

Precise Data – at Scale – Brings Analytics to Life

**HYPER
LOCAL**

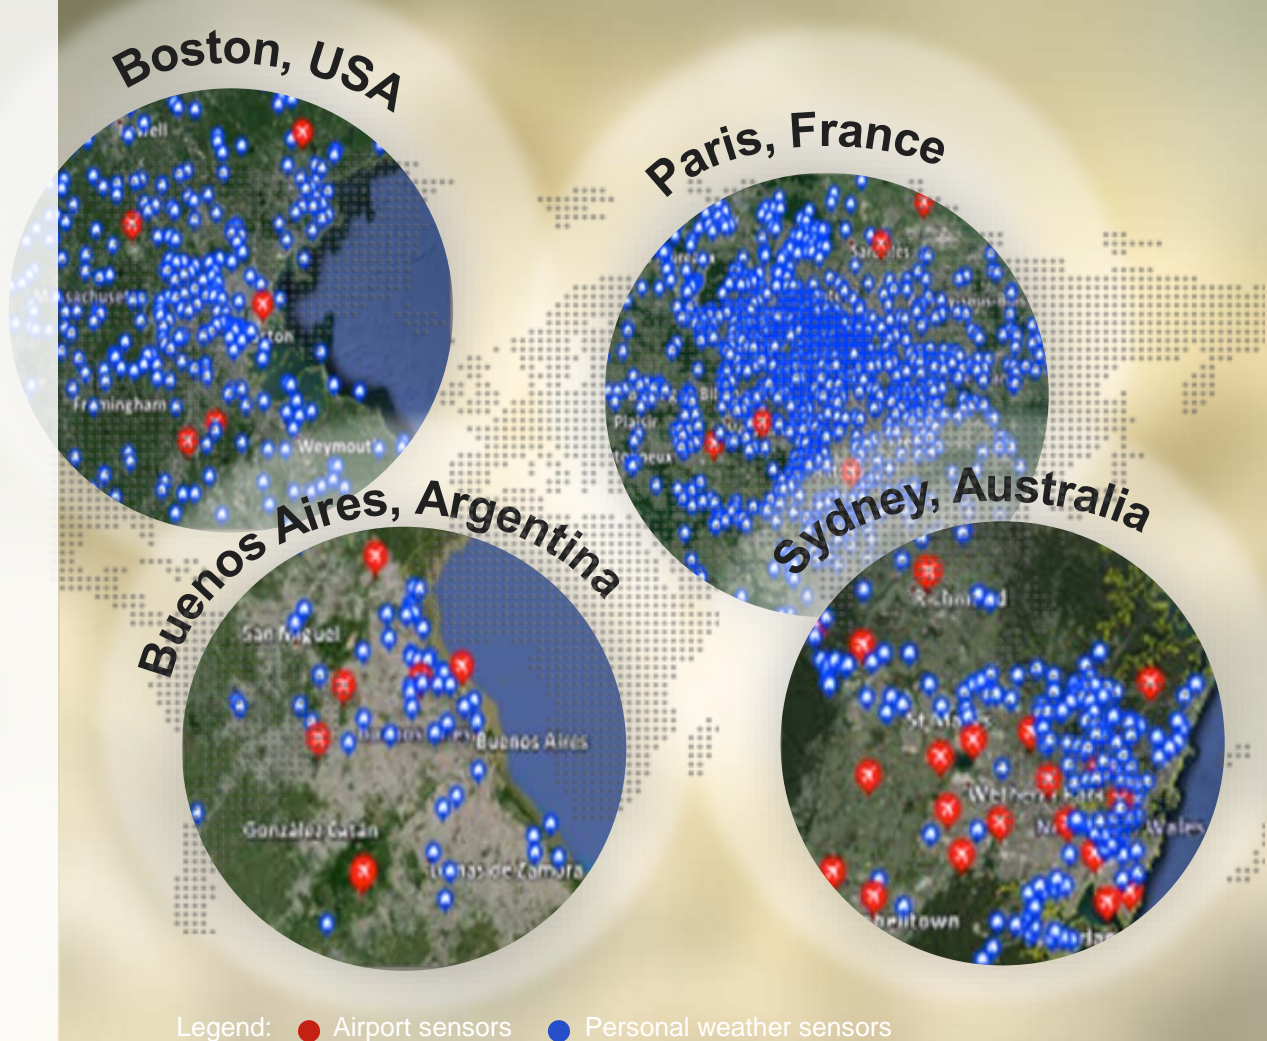

**HIGHLY
VARIABLE**

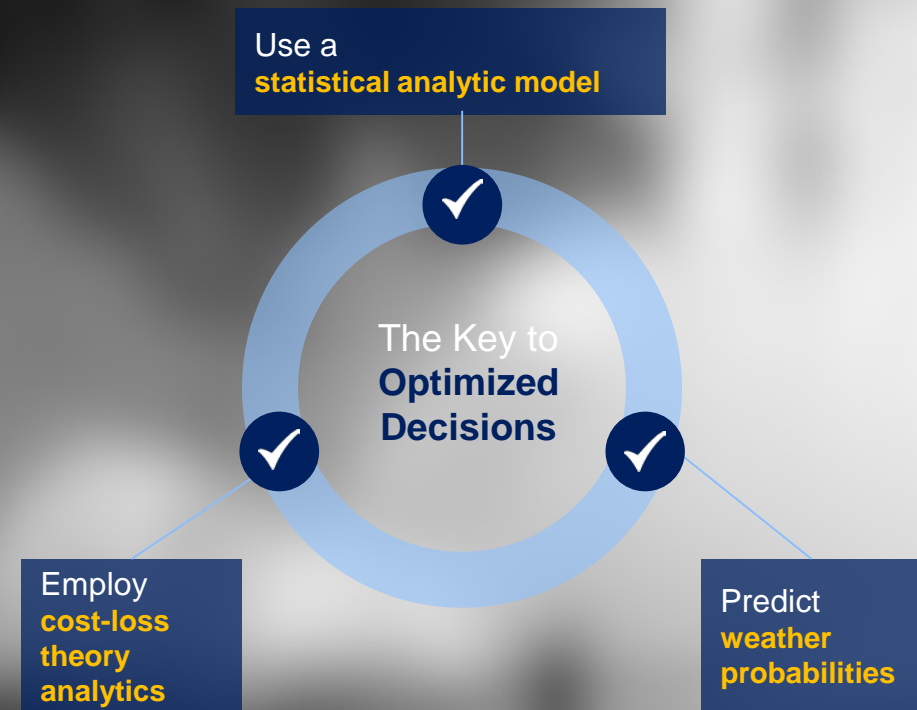

100x More Sensors Than Public Sources

200,000 Personal
Weather Stations

Analytics & Probability Forecasts

Decisions made without probability-based analytics will always result in suboptimal economic outcomes

SCENARIO	How much fuels should this plane have?
	80% chance of on-time arrival
	10% chance of 15min weather delay
	5% chance of 30 min delay
	3% chance of 1 hour delay
	2% chance of 2 hour delay

Infrastructure Performance

24+ TB
compressed

ingested per day
in production

100s PBs
in data lakes

analyzed and
stored

15 Billion
API requests

handled per day

>100
data types

supported today

THE BETTER CHOICE:

Focus on creating incremental value and use **SUN**, the only purpose-built, cloud-based platform for big data.

INGEST

Absorb tens of billions of daily streaming data points

TRANSFORM

Language-agnostic container-based processing for optimal storage, routing, and analysis

PERSIST

Retain and retrieve hundreds of terabytes on demand

ANALYZE

Extract insights using hundreds of simultaneous advanced analytics models

DISTRIBUTE

Serve tens of billions of daily API calls with millisecond response

Thank You
