We started at:

What is
meaningful
and
for whom?

And evolved to:

What does the operator ***need***?

How do they get it?

When do they get it?

Where do they get it?

Discussion:

What are the **actions** to address these questions?

Who takes the action?

What does the operator ***need***?

How do they get it?

When do they get it?

Where do they get it?
