Having been involved in coordinating some meetings, I would think a decision would need to be made NLT July 1. Otherwise, good spaces are all taken, hotels and flights are more complicated, etc.

Another thought is to do a one-day federal agency TEM overview in the fall as a lead in for a full three day meeting next spring

(1 liked)[5/12 12:08 PM] Mendonca, Nancy (HQ-EO000) (Guest)

Is pulling together a summary from the meeting and a "book" of Federal Wx efforts something that an Intern would find value in doing? I could look through our list of NASA intern applicants to indentify some potential options to help.

Mendonca, Nancy (HQ-EO000) that's a great idea, Nancy. It's so hard to run a meeting and take notes and do summaries...

[5/12 12:21 PM] Bass, Randy (FAA) (Guest)

Nancy, I don't know about the summary part but we have two interns starting in a few weeks that we can certainly leverage to do some legwork on the TEM effort, including tracking down some information on what agencies do.

I favor Marilyn's idea, too. Assuming (bad idea...) that UCAM vehicles are going to operate largely in the VMC world, it seems like a great field for the expansion of Walter Comb's VWOS system.

It seems like the topic cover "education-discussion-awareness", status towards solving an issue but maybe I'm missing a "roll up yourselves - brainstorming" topic. Like the space launch topic - here are the issues... how do we move forward to solve them e.g recommend to the commercial space launch providers that they work with a standards body to develop updated weather launch criteria.
